Washington DC | +1-(571)-237-1771 | aditi.vyas@gwu.edu | [LinkedIn Profile](#)

EDUCATION

The George Washington University , School of Engineering & Applied Science Master of Science in Computer Science Specialization: Artificial Intelligence & Cybersecurity	August 2023 – May 2025
New Horizon College of Engineering , Affiliated to VTU Bachelor of Science in Computer Science & Engineering	July 2019 – June 2023

SKILLS

Technical Skills: Python, C, HTML, CSS, Bootstrap, Java.
Soft Skills: Communication, Leadership, Detail Oriented, Time Management, Creativity.
Software Skills: Microsoft Word, Microsoft Power point, Microsoft Excel, Canva.

RELEVANT PROJECTS

Sign Language Detection using LSTM and MediaPipe Developed a sign language detection system using LSTM networks and MediaPipe technology to improve communication for the deaf and hard of hearing; optimized design through targeted research.	October 2024 – December 2024
Flight Delay Prediction Implemented machine learning models (Linear Regression, Gradient Boosting, Random Forest) to predict flight delays, with the Gradient Boosting model achieving the highest accuracy of 92%.	January 2024 – May 2024
Hand Gesture Based Navigation Created a hand gesture-based web browser navigation system using YOLO and custom datasets, enhancing user accessibility and interaction.	January 2024 – May 2024
Sentiment Analysis Developed a sentiment analysis tool using Scala to analyze the sentiment of social media posts, achieving an accuracy rate of 85%.	August 2023 – December 2023
Location Aware Holiday Planner Developed an Android application in Android Studio for booking holiday locations, integrating Java tools and a database to allow users to book based on reviews and opening/closing times.	August 2022 – December 2022
BMyVision: A Virtual Eye for the Visually Impaired Designed an application using Python, YOLO, and NLP to detect and describe objects for visually impaired users, significantly improving their ability to interact with their environment.	January 2023 – May 2023

WORK EXPERIENCE

Rovae Incorporation , Bangalore, India <i>Software Engineer Intern</i> I developed and maintained 5+ responsive websites tailored to client requirements, enhancing user engagement and satisfaction. I collaborated with a cross-functional engineering team to plan and design project features and architecture, reducing development time by 20%. By implementing user feedback, I refined website functionalities, resulting in a 15% increase in client satisfaction ratings.	January 2023 – May 2023
--	-------------------------

PUBLICATION

<i>International Journal of Scientific Research in Science, Engineering and Technologies</i> Paper was delivered at the 4th National Conference on Advancements in Computer Science and Engineering (print ISSN: 2395-1990 online ISSN: 2394-4099). May 2022, Volume 9, Issue 11.
